I.2 Tablou macroeconomic

Economia Romaniei a inregistrat in anul 2017 cel mai accelerat ritm de crestere din anul 2008, incheind anul cu un avans al PIB-ului de 7% intr-un context extern favorabil, influentat de climatul din Zona Euro (principalul partener comercial) si de mix-ul pro-ciclic de politici economice, la nivel intern.

Accelerarea economiei a fost determinata, in principal, de contributia cererii interne. Se remarca cresterea consumului privat (principala componenta a PIB), datorita venitului disponibil al populatiei si al climatul pozitiv al pietei creditului (sustinut de nivelul scazut al ratelor de dobanda).

Banca Nationala a Romaniei (BNR) a continuat ciclul monetar post-criza, mentinand dobanda de referinta la valoarea de 1.75% in perioada 2015-2017.

Consumul public a crescut pentru al patrulea an la rand, inregistrand o dinamica pozitiva de 1.6% in anul 2017.

Preturile de consum masurate prin indicele armonizat UE al preturilor de consum (IAPC) au inregistrat o dinamica anuala negativa fiind influentate de scaderea cotelor TVA (la alimente si servicii de alimentatie de la 24% la 9% incepand cu 1 iunie 2015 si a cotei generale, de la 24% la 20% incepand cu 1 ianuarie 2016), evolutiile de pe piata valutara, dinamica cotatiilor internationale la titei si performanta cererii interne.

In anul 2017 preturile de consum au inregistrat un avans puternic pe fondul evolutiei economiei la un ritm peste potential, liberalizarea preturilor la energie, fluctuatiile din pietele internationale de materii prime si deprecierea monedei nationale

Exporturile nete (exporturi – importuri) au avut o contributie negativa la formarea PIB desi cererea externa a beneficiat de un avans puternic datorita climatului favorabil din Zona Euro, fiind ameliorat de dinamica superioara a importurilor, ce au satisfacut cererea interna.

Avansul importurilor a condus la intensificarea deficitului balantei comerciale, in contextul in care cererea interna depaseste oferta de produse si servicii, inregistrand cel mai ridicat nivel post-criza.

Climatul pozitiv din piata fortei de munca s-a consolidat beneficind de o evolutie pozitiva a ciclului investitional post-criza, fiind influentat de migratia populatiei active si diminuare ponderii economiei informale. Rata somajului a atins la finanlul anului 2017 valoarea de 4.9%, inregistrand cel mai scazut nivel din perioada analizata.

Indicele sentimentului economic realizat de catre Comisia Europeana a inregistrat un trend ascendent in perioada analizata, atingand valoarea maxima in luna Mai 2017 ca urmare a evolutiei pozitive a economiei. Spre finalul anului 2017 inregistreaza valori mai scazute pe fondul asteptarii decelerarii ritmului de crestere economica.

Indicele "increderea consumatorilor" a inregistrat de asemenea un trend pozitiv in perioada analizata, accentuandu-se incepand cu anul 2015, o data cu reducerea cotei TVA si a cresterilor salariale. Incepand cu a doua jumatea a anului 2017, indicele inregistreaza scaderi pe fondul anticipatiilor inflationiste si a incertitudinilor privind politica fiscala.

Indicele increderii industriale a inregistrat un trend ascendent datorita climatului extern favorabil si cresterii cererii interne.

Indicele increderii in comert a avut o evolutie pozitiva, atingand valoarea maxima in luna Iunie 2015 pe fondul reducerii cotei de TVA.

Indicele increderii in constructii, a inregistrat un avans beneficind de un climat pozitiv intern al pietei creditarii si a veniturilor disponibile ale populatiei.
